

PRECREDITCHECK COMPLEX

PreCreditCheck Complex from Regis24 is one of the most affordable solutions on the market in terms of investigating the trustworthiness of end users, for example in procedures relating to payment enforcement and pre-court collection.

Our solvency-checking solution supplies you daily with hard data relating to negative attributes and lays the groundwork for your strategic course of action. Because debtors who are unable to pay reduce your chance of a successful and financially viable recovery. And when it comes to debtors with negative characteristics, the nature of these negative attributes can play a crucial role in whether you successfully collect.

ADVANTAGES FOR YOUR BUSINESS WITH PRECREDITCHECK COMPLEX FROM REGIS24:

- creditworthiness queries, in as much detail as possible, about which entries have firmly negative attributes
- one of the most affordable solutions for day-to-day creditworthiness queries on the market
- ideal for debt collection services
- up to 100% success-based pricing – you only pay when our performance is successful
- no minimum purchase or minimum contract period
- established and certified since 2003

HOW PRECREDITCHECK COMPLEX FROM REGIS24 WORKS, IN DETAIL:

With our PreCreditCheck, you protect yourself against the risk of non-payment by defaulting, insolvent or unwilling customers.

- 1) your system transmits data queries to us via an application programming interface (API) or by way of classic batch requests over the Regis24 customer portal
- 2) our system automatically standardises the name and address to save the identity of the customer
- 3) the standardised request data is collated daily with registries of debtors and insolvencies
- 4) you receive the necessary information, in as much detail as possible, about which entries have indisputably negative attributes.

WHAT'S THE DIFFERENCE BETWEEN PRECREDITCHECK SIMPLE AND COMPLEX?

The difference lies in the depth of detail of your results. For example, the PreCreditCheck Complex package provides you with all the definitively negative features of an identity – on a daily basis – whereas PreCreditCheck Simple only provides a classification (in terms of either negative or positive creditworthiness), based on the negative findings obtained.
